

ESL Offline Speaking Games

1 · Unzip

Unzip ESL-Offline-Speaking-Games-Pack.zip to your computer or a USB stick. Keep the folders together.

2 · Double-click START-HERE.html

It opens in your browser (Chrome, Edge, Safari or Firefox). No internet, no account, no install.

3 · Choose a game and a level

Click a game card, then open Prompts to choose A1–A2, B1–B2 or All. Press F for full screen.

Every game: the same controls

Key	What it does
Space	Next prompt (spin, next card, new story...)
T	Start / pause the timer
F	Full screen
Esc	Close the Prompts panel or a message
?	Help and all shortcuts for that game

Use your own prompts

Open Prompts, paste one prompt per line into My prompts, then press Use my prompts. Each game shows its own format with an example. Would You Rather uses two options split by a bar:

```
live by the sea | live in the mountains
have a pet dog | have a pet cat
# lines starting with # are skipped
```

You need at least 3 prompts (maximum 300). Built-in prompts are in English only; your own prompts can be in any language, including Chinese, Japanese and Korean. Name a list and press Save list to keep up to 20 lists per game.

Common questions

Safari or a school laptop will not open the file? Unzip first, then right-click START-HERE.html → Open With → your browser. Safari may ask once to allow local files: choose Allow. Needs Chrome or Edge 87+, Firefox 75+ or Safari 14.1+.

Where are my prompts saved? Only in this browser on this computer (local storage). Nothing is uploaded. Clearing browsing data deletes saved lists, and each game keeps its own lists.

Changing computers? In each game, open Prompts → Export .txt to save your list as a text file. On the new computer use Import .txt.
