FACELESS CREATOR KIT · BUNDLE

BUNDLE GUIDE · READ THIS FIRST

5-Niche Shorts Script Vault Bundle

750 hooks and 300 original, timed scripts across five faceless niches: Reddit-style stories, history, animal, psychology and space facts. One merged CSV, filterable by niche and length.

100× 30s · 100× 45s · 100× 60s

750 hooks · 300 scripts · 1900 timed beat rows · 5 niches · 30 files + ZIP

RED	HIS	ANI	PSY	SPA
Reddit-Style Stories	History Facts	Animal Facts	Psychology Facts	Space Facts
150 hooks · 60 scripts	150 hooks · 60 scripts	150 hooks · 60 scripts	150 hooks · 60 scripts	150 hooks · 60 scripts

Start here

Your download has 30 files (12 PDFs: 10 vaults + this guide in Letter and A4 · 18 CSVs) plus the ZIP they came in. Each niche has 150 hooks and 60 scripts (20× 30s · 20× 45s · 20× 60s). Here is what every file is and what to open first.

1
This guide
File map, how to filter the merged CSV, hook types, FAQ and license.

2
One niche PDF
Read the vault for the niche you want to test first. Letter for US printers, A4 elsewhere.

3
ALL-NICHES CSVs
Open in Excel or Google Sheets when you are ready to batch scripts.

FILE	WHAT IT IS	OPEN WITH
A · 10 NICHE PDFS (LETTER + A4 OF EACH)		
Reddit-Story-Script-Vault_Letter.pdf / _A4.pdf	RED Reddit-Style Stories	PDF reader
History-Facts-Script-Vault_Letter.pdf / _A4.pdf	HIS History Facts	PDF reader
Animal-Facts-Script-Vault_Letter.pdf / _A4.pdf	ANI Animal Facts	PDF reader
Psychology-Facts-Script-Vault_Letter.pdf / _A4.pdf	PSY Psychology Facts	PDF reader
Space-Facts-Script-Vault_Letter.pdf / _A4.pdf	SPA Space Facts	PDF reader
B · 15 PER-NICHE CSVS: <NICHE>_HOOKS / _SCRIPTS / _SCRIPT_BEATS		
Reddit-Stories_hooks.csv · _scripts.csv · _script_beats.csv	Original files of the RED vault	Excel / Sheets
History-Facts_hooks.csv · _scripts.csv · _script_beats.csv	Original files of the HIS vault	Excel / Sheets
Animal-Facts_hooks.csv · _scripts.csv · _script_beats.csv	Original files of the ANI vault	Excel / Sheets
Psychology-Facts_hooks.csv · _scripts.csv · _script_beats.csv	Original files of the PSY vault	Excel / Sheets
Space-Facts_hooks.csv · _scripts.csv · _script_beats.csv	Original files of the SPA vault	Excel / Sheets
C · 5 BUNDLE FILES		
ALL-NICHES_hooks.csv	All 750 hooks, one `niche` column	Excel / Sheets
ALL-NICHES_scripts.csv	All 300 scripts (100 each of 30, 45, 60 s)	Excel / Sheets
ALL-NICHES_script_beats.csv	1900 timed beats: start, end, visual, caption pause	Excel / Sheets
Bundle-Guide_Letter.pdf / _A4.pdf	This guide	PDF reader

Same content, two shapes
Group B and group C hold the same rows. Use B if you only work one niche; use C to filter across all five in one sheet. The ZIP is `Shorts-Script-Vault-Bundle.zip`.

CSVs are UTF-8
If curly quotes look odd in an older Excel, open the file with **Data → From Text/CSV** and choose UTF-8. Google Sheets reads them as they are.

How to use the merged CSV

All five vaults live in three files that start with `ALL-NICHES_`. Every row has a **uid** (niche prefix + original ID) and a **niche** column, so one filter gets you any niche.

ALL-NICHES_scripts.csv — filter: niche = Animal Facts · length_s = 60

	uid	niche	script_id	title	length_s	word_count
162	ANI-S41	Animal Facts	S41	Three Hearts, Blue Blood: Inside an Octop…	60	129
163	ANI-S42	Animal Facts	S42	How Fireflies Make Light Without Heat	60	123
164	ANI-S43	Animal Facts	S43	Penguins Don't Live at the North Pole	60	120

Four jobs, step by step

1. **Filter by niche and length**
   Excel: **Data → Filter**. Google Sheets: **File → Import → Upload**, then **Data → Create a filter**. Pick a value in `niche`, then in `length_s` (30, 45 or 60).

2. **Send scripts to your TTS or editor**
   Copy `full_voiceover` into your text-to-speech tool. For timed captions, filter `ALL-NICHES_script_beats.csv` by the same `uid`: each beat has `start_s`, `end_s`, visual and caption pause.

3. **Add your own hooks**
   Append rows to the end of `ALL-NICHES_hooks.csv`. Use the prefix `OWN-` for the uid (e.g. `OWN-H001`) so your lines never clash with ours.

4. **Prep a week of scripts**
   Filter one niche + one length, copy 7 rows to a new tab, and work down the list.

> **Honest note**
> Step 4 is manual filtering in your spreadsheet. The bundle is a script library, not an automatic generator or a content calendar. Every script title is in the `title` column of ALL-NICHES_scripts.csv and in each niche PDF's contents.

Columns at a glance

FILE	ROWS	KEY COLUMNS
`ALL-NICHES_hooks.csv`	750 (5 × 150)	`uid` `niche` `hook_type` `category` `hook_text` `word_count`
`ALL-NICHES_scripts.csv`	300 (5 × 60)	`uid` `niche` `title` `length_s` `full_voiceover` `verify_with` `myth_check` `cta`
`ALL-NICHES_script_beats.csv`	1900	`uid` `beat_no` `start_s` `end_s` `voiceover` `visual` `caption_pause` `tone`

Reddit-style rows: `verify_with` = "Original fiction (no source needed)" and `myth_check` is empty. Columns a niche never had are left blank.

Hook-type map

Each niche has its own 10 hook types, 15 hooks each. Dashed cells marked **shared** appear in more than one niche; every other type is written for that niche only.

	RED · Stories	HIS · History	ANI · Animal	PSY · Psychology	SPA · Space
01	Judgment ask 15 · H001–H015	Myth vs reality 15 · H001–H015	Superpower 15 · H001–H015	Your brain is lying 15 · H001–H015	Scale it down 15 · H001–H015

10	Unsettling/mystery 15 · H136–H150	Unsolved or lost 15 · H136–H150	Record holder 15 · H136–H150	Would you? 15 · H136–H150 shared	Would you? 15 · H136–H150 shared

Cross-niche tip

A shared type is an easy way to test a second niche: filter `hook_type` = "Myth busted" in `ALL-NICHES_hooks.csv` and you get one list across animal, psychology and space.

FAQ

Which niches are covered?

Five: RED Reddit-Style Stories · HIS History Facts · ANI Animal Facts · PSY Psychology Facts · SPA Space Facts

What is not included?

- True crime
- Dark history
- Finance
- Motivation
- AI tools
- Any language other than English
- Stock footage, images, music or voiceover audio

How much is in each niche?

150 hooks and 60 scripts per niche: 20× 30s · 20× 45s · 20× 60s. Across the bundle: 750 hooks, 300 scripts, 1900 timed beat rows.

Is one story written at 30, 45 and 60 s?

No. Every script is a different story or fact, written once at one length. There are no long and short versions of the same script.

Are the Reddit-style stories real posts?

No. They are original fiction written in the style of advice-forum stories. They are not copied from Reddit or any user.

Are the facts checked?

Each history, animal, psychology and space script has a `verify_with` source pointer and a myth check. Please confirm the fact against that source before you publish; science and dates get updated.

How do I add my own hooks?

Add rows at the end of `ALL-NICHES_hooks.csv` and start each uid with `OWN-` (OWN-H001, OWN-H002...).

Can it plan my week for me?

No. Batching a week means filtering one niche and length and copying 7 rows by hand. This is a library, not an AI generator and not a content calendar.

Will these scripts get me views or money?

No product can promise that. You get ready-to-record, timed scripts; results depend on your visuals, voice, consistency and the platform.

I already bought a single vault.

Email **chenphien@gmail.com** with your order receipt and ask for a credit of what you paid toward the bundle. It is handled by hand.

Refunds

You can ask for a refund within 14 days of purchase at the same email.

License

One purchase = one creator. Use the hooks and scripts to make your own videos; just don't pass the files on.

✓ You may

- Record, voice and publish the scripts on your own channels: YouTube Shorts, TikTok, Reels and similar.
- Use them on monetized channels.
- Edit, shorten, translate or rewrite any hook or script.
- Import the CSVs into your own spreadsheets, TTS and editing tools.

✕ You may not

- Resell, share, give away or re-upload the PDFs or CSVs, whole or in part.
- Bundle the files into another product, course, PLR or template pack.
- Publish the hook or script lists as text collections.

Making videos for clients?
If you run Shorts for clients (agency, VA, freelancer), **buy one copy per client** whose channel uses the scripts.

Support
