S58 Magna Carta Was Cancelled Within Weeks Medieval life 75
S59 When Maps Showed California as an Island Exploration 76
S60 Canned Food Came Before the Can Opener Inventions & science 77

How to use this vault

150 history hooks and 60 finished scripts, each timed beat by beat: what to say, what to show, where to pause and how to sound. Seven steps from page to posted video:

1. **Pick a hook**
   Browse the hook library (pages 6–15): 10 hook types, 15 hooks each. Use one as an opener, a title idea or a cover line.

2. **Pick a script**
   Use the script index (page 16) to choose by length (30, 45 or 60 s) and theme. Each script is one page.

3. **Check the "Verify with" line**
   Look the core fact up in the named reference before you record. Read the "Myth check" line so you don't repeat the popular wrong version.

4. **Swap the 3 "Make it yours" points**
   Each script lists 3 concrete swaps: a different opening, focus or question. Change at least one so your video is your own.

5. **Record the voiceover**
   Your own voice or any text-to-speech voice. Read the Voiceover column and pause where the Caption / pause column says.

6. **Add visuals per beat**
   The Visual column names one visual type per beat: a map, a public-domain painting, a museum open-access photo, a simple re-creation or a timeline graphic.

7. **Post it**
   Copy the "Ready to post" box: title, one-line description, 3 hashtags, cover text, and the comment to pin.

The read-speed rule		`2.5 words / second = 150 wpm`
`30 s 55–75 words | 45 s 85–112 | 60 s 115–150 · 2.5 words/s`		
30 s scripts	5 beats	beat 1 = 0–3 s (the hook)
45 s scripts	6 beats	last beat = payoff + comment question
60 s scripts	8 beats	each beat: at most 2.5 × seconds + 2 words

Working in bulk?

The same text is in 3 CSV files: `hooks.csv`, `scripts.csv` (one row per script) and `script_beats.csv` (one row per beat). Import them into Google Sheets or Excel; see README.txt.

Accuracy & platform notes

History channels live or die on trust. Read this once before you post.

How the facts were chosen

- Every script is built on widely documented, non-disputed core events and people who died before 1950; events are before 1992.
- Where sources give different numbers or dates, the script says “about” or “around”, or leaves the number out. Contested figures are flagged (“reportedly”, “debated”).
- No quotes are put in the mouths of historical figures. The only quoted words are well-recorded ones, such as a telegraph message.
- Our build process checked every script for internal consistency: dates, names and numbers match across the page, the CSVs and the hooks.

We are not professional historians

These scripts were written from widely documented history, but they are not academic research and have not been reviewed by professional historians. **Check each fact against the named reference before posting.** The “Verify with” line names where to look; it is a pointer, not a guarantee.

If a viewer corrects you

Thank them, check the point in the named reference, and if they are right, pin a correction comment and fix the description. A visible correction usually builds more trust than silence.

Image and footage rights

Use public-domain paintings and maps, museum open-access images, your own drawings and re-creations, or footage you have the rights to. Check the licence of every image. Never use clips from copyrighted films or shows.

AI voices and disclosure

Follow each platform’s current rules on AI-generated or synthetic content, and turn on its disclosure label whenever a rule applies (for example, realistic AI voices or images).

What this vault does not promise

No script can promise views, followers, monetization or income. This vault saves you research-outline, writing and timing work; the channel is still yours to build.

01
OF 10

Myth vs Reality

Open on something "everyone knows", then knock it down in the next breath. Best with scripts that carry a Myth check note.

`You were taught [POPULAR VERSION]. + [DOCUMENTED VERSION IN 8 WORDS OR FEWER]`

H001	You were taught Napoleon was tiny. He was average height for his time.	Turning-point days	13 w
H002	Medieval people didn't think the Earth was flat. Educated Europeans knew it was round.	Medieval life	14 w
H003	Vikings never wore horned helmets. Blame an 1876 opera.	Medieval life	9 w
H004	Columbus didn't prove the Earth was round. Nobody serious doubted it.	Exploration	11 w
H005	Medieval people drank water too. The "only beer" story is a myth.	Everyday life	12 w
H006	Marie Antoinette probably never said 'Let them eat cake.'	Turning-point days	9 w
H007	The Great Wall isn't visible from the Moon with the naked eye.	Ancient world	12 w
H008	Gladiator fights didn't always end in death. Many fighters walked away.	Ancient world	11 w
H009	Paul Revere never shouted 'The British are coming!'	Turning-point days	8 w
H010	Thomas Edison didn't invent the light bulb. He improved it.	Inventions & science	10 w
H011	Ancient Greek statues weren't plain white. Many were brightly painted.	Ancient world	10 w
H012	You think Cleopatra was Egyptian. Her family was Macedonian Greek.	Ancient world	10 w
H013	Franklin never proposed the turkey as national bird. He praised it in a letter.	Odd laws & customs	14 w
H014	Knights didn't need cranes to climb onto their horses.	Medieval life	9 w
H015	Magellan didn't sail around the world. He died before the voyage ended.	Exploration	12 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

02
OF 10

This Date

A calendar date makes a fact feel like a news flash. Post it on the anniversary, or use it to open any turning-point script.

`On [MONTH DAY], [YEAR], + [WHAT HAPPENED, IN ONE PLAIN CLAUSE]`

H016	On December 17, 1903, a powered plane flew for twelve seconds.	Turning-point days	11 w
H017	On May 24, 1844, a message crossed forty miles in an instant.	Inventions & science	12 w
H018	On September 2, 1666, a London bakery fire began. It burned four days.	Turning-point days	13 w
H019	On September 2, 1752, Britons went to bed and woke up on the 14th.	Turning-point days	14 w
H020	On October 4, 1957, a metal ball started beeping from orbit.	Turning-point days	11 w
H021	On November 9, 1989, a border opened that had split a city for decades.	Turning-point days	14 w
H022	On May 10, 1869, a golden spike finished the first transcontinental railroad.	Turning-point days	12 w
H023	In July 1799, soldiers in Egypt found the stone that unlocked hieroglyphs.	Ancient world	12 w
H024	On August 3, 1492, three ships left Spain. Nobody aboard expected America.	Exploration	12 w
H025	On June 15, 1215, a king agreed to rules he didn't plan to keep.	Medieval life	14 w
H026	On November 8, 1895, a German lab screen glowed when it shouldn't have.	Inventions & science	13 w
H027	On January 10, 1863, London's first underground trains carried passengers.	Everyday life	10 w
H028	On May 6, 1840, the world's first postage stamp became valid.	Everyday life	11 w
H029	On October 4, 1582, parts of Europe went to bed. Tomorrow was October 15.	Turning-point days	14 w
H030	On December 14, 1911, a team reached the South Pole first.	Exploration	11 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

03
OF 10

Day in the Life

Put the viewer inside an old job. Second person ("you") makes everyday history feel personal. Best with Everyday life scripts.

`If you were a [JOB] in [YEAR OR ERA], + [ONE CONCRETE DAILY DETAIL]`

H031	If you were a knocker-upper in 1900, your job was waking people up.	Everyday life	13 w
H032	If you were a medieval scribe, one book could take you months.	Medieval life	12 w
H033	If you were a Roman soldier, you also had to be a builder.	Ancient world	13 w
H034	If you were a sailor in the 1700s, lemons could save your life.	Exploration	13 w
H035	If you were a lamplighter in 1850, you lit a whole street by hand.	Everyday life	14 w
H036	If you built pyramids in Egypt, your wages included bread and beer.	Ancient world	12 w
H037	If you were a telegraph operator in 1870, you could hear words in clicks.	Inventions & science	14 w
H038	If you were a medieval peasant, church feast days gave you days off.	Medieval life	13 w
H039	If you were a Victorian kitchen dog, your job was turning the roast.	Everyday life	13 w
H040	If you were a ship's navigator in 1600, longitude was mostly estimation.	Exploration	12 w
H041	If you were a Roman shopper, lunch came from a street counter.	Everyday life	12 w
H042	If you were a Tudor-era Londoner, the law said what fabric you could wear.	Odd laws & customs	14 w
H043	If you were an ice cutter in 1850, winter was your harvest season.	Everyday life	13 w
H044	If you were a lighthouse keeper in 1880, you trimmed wicks all night.	Exploration	13 w
H045	If you were a London postman in 1900, you delivered several times a day.	Everyday life	14 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

04
OF 10

Object with a Story

Start on one thing you can show: an artefact photo, a map, a museum object. The object is the visual for beat 1.

`This [OBJECT] + [THE ODD THING IT DID OR SHOWS]`

H046	This iron helmet from Norway has no horns. That's the point.	Medieval life	11 w
H047	This broken stone slab let people read hieroglyphs again.	Ancient world	9 w
H048	This corroded bronze lump from a shipwreck turned out to be a gear machine.	Ancient world	14 w
H049	This blurry rooftop view is the oldest surviving camera photograph.	Inventions & science	10 w
H050	This book has been studied for a century. Nobody can read it.	Lost & unsolved	12 w
H051	These chess pieces were carved from walrus ivory and found on a Scottish island.	Medieval life	14 w
H052	This clock solved a problem that sank ships for centuries.	Exploration	10 w
H053	This tiny black stamp changed how the whole world sends letters.	Everyday life	11 w
H054	This golden spike was driven in, then pulled straight back out.	Turning-point days	11 w
H055	This X-ray of a hand shocked the world in 1896.	Inventions & science	10 w
H056	This one carved word is nearly all the Roanoke colonists left behind.	Lost & unsolved	12 w
H057	This old map shows California as an island. Mapmakers copied it for decades.	Exploration	13 w
H058	This Roman dome has stood for nearly 1,900 years without steel inside.	Ancient world	12 w
H059	This Bible was printed with movable metal type around 1455.	Medieval life	10 w
H060	This tin can came with no can opener. That arrived decades later.	Inventions & science	12 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

05
OF 10

How close it came / Near miss

Show how a famous outcome nearly didn't happen. Keep the stakes real but plain: no gore, no exaggeration.

`[FAMOUS OUTCOME] almost didn't happen. + [THE MOMENT IT NEARLY WENT WRONG]`

H061	Every man on Shackleton's Endurance survived after ice crushed the ship.	Exploration	11 w
H062	Magna Carta was cancelled within ten weeks. It survived anyway.	Medieval life	10 w
H063	Gutenberg printed his famous Bible, then lost his workshop in a lawsuit.	Inventions & science	12 w
H064	The clockmaker who solved longitude nearly never got paid for it.	Exploration	11 w
H065	The Rosetta Stone was found by French soldiers. Britain ended up with it.	Ancient world	13 w
H066	The Library of Congress burned in 1814. A former president's books replaced it.	Turning-point days	13 w
H067	In 1911, the Mona Lisa vanished from the Louvre for over two years.	Lost & unsolved	13 w
H068	In 1666, London helped stop a giant fire by blowing up its own houses.	Turning-point days	14 w
H069	The Wright Flyer first flew in America but spent twenty years in London.	Inventions & science	13 w
H070	The ancient gear machine sat in a museum for months before anyone noticed.	Ancient world	13 w
H071	The supply ship for Roanoke arrived three years late. Everyone was gone.	Lost & unsolved	12 w
H072	Five ships left Spain in 1519. Only one sailed all the way around.	Exploration	13 w
H073	In the 1790s, the Bayeux Tapestry was reportedly almost used as a wagon cover.	Medieval life	14 w
H074	The first big telegraph line was meant to run underground. The buried wire failed.	Inventions & science	14 w
H075	The Lewis and Clark expedition lost only one man, most likely to appendicitis.	Exploration	13 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

06
OF 10

Then vs Now

Take something normal today and show how different it was. Great for Everyday life and Odd laws scripts.

`In [YEAR], [NORMAL THING TODAY] + [HOW IT WORKED BACK THEN]`

H076	In 1830, the person receiving a letter in Britain usually paid for it.	Everyday life	13 w
H077	In 1840, many British towns kept their own local time.	Everyday life	10 w
H078	In 1820, summer ice was a luxury cut from frozen New England ponds.	Everyday life	13 w
H079	In 1865, British law limited steam road vehicles to four miles an hour.	Odd laws & customs	13 w
H080	In 1400, almost every book in Europe was copied by hand.	Medieval life	11 w
H081	In 1700, sailors couldn't reliably tell how far east or west they were.	Exploration	13 w
H082	In 1894, nobody had ever seen inside a living body without surgery.	Inventions & science	12 w
H083	In 1700, a Londoner might pay a tax on how many windows they had.	Odd laws & customs	14 w
H084	In 1850, London's sewage flowed straight into the river people drank from.	Turning-point days	12 w
H085	In 79 AD, many Pompeii residents grabbed hot food from street counters.	Everyday life	12 w
H086	In 1750, England's legal year still began on March 25.	Odd laws & customs	10 w
H087	In 1900, nobody had ever stood at the South Pole.	Exploration	10 w
H088	In 1890, nobody had ever flown in a powered, controlled airplane.	Inventions & science	11 w
H089	In 1314, playing football in London's streets could get you jailed.	Odd laws & customs	11 w
H090	In 1950, nothing made by humans had ever orbited Earth.	Inventions & science	10 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

07
OF 10

Forgotten Event

A real, well-documented event most viewers have never heard of. Name the year early so it feels concrete.

`In [YEAR], [PLACE] + [THE EVENT, TOLD IN ONE SURPRISING CLAUSE]`

H091	Before the Mayflower, an English colony vanished from the map.	Lost & unsolved	10 w
H092	In 1858, the Thames smelled so bad Parliament worked behind chemical-soaked curtains.	Turning-point days	12 w
H093	In the 1400s, Chinese fleets reached East Africa, decades before Columbus sailed.	Exploration	12 w
H094	In 1883, a volcano's blast was heard almost 3,000 miles away.	Turning-point days	11 w
H095	In 1816, Europe and North America had a 'year without a summer.'	Turning-point days	12 w
H096	In 1814, a flood of beer swept through a London street.	Everyday life	11 w
H097	Pigs and other animals were once put on trial in European courts.	Odd laws & customs	12 w
H098	In 1859, telegraph wires sparked during a giant solar storm.	Inventions & science	10 w
H099	In the 1560s, Spanish galleons began crossing the Pacific with silver each year.	Exploration	13 w
H100	Roman engineers built tens of thousands of miles of paved roads.	Ancient world	11 w
H101	Turnspit dogs once ran in wheels to roast meat in British kitchens.	Everyday life	12 w
H102	In 1783, a sheep, a duck and a rooster flew in a hot-air balloon.	Inventions & science	14 w
H103	A Viking settlement in Canada sat forgotten until the 1960s.	Exploration	10 w
H104	Medieval London had a bridge lined with houses and shops.	Medieval life	10 w
H105	Around 1259 BC, Egypt and the Hittites signed a written peace treaty.	Ancient world	12 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

08
OF 10

Number Shock

Lead with one widely documented number. Round it and say “about” where sources differ; never invent a precise figure.

`[ONE WIDELY DOCUMENTED NUMBER] + [WHAT MAKES IT SURPRISING]`

H106	Cleopatra lived closer to the Moon landing than to the Great Pyramid’s construction.	Ancient world	13 w
H107	Cologne Cathedral took over 600 years to finish.	Medieval life	8 w
H108	About 18 of roughly 270 men finished the first voyage around the world.	Exploration	13 w
H109	The first photograph needed an exposure of many hours, maybe days.	Inventions & science	11 w
H110	Britain’s window tax lasted 155 years.	Odd laws & customs	6 w
H111	The first powered flight covered 120 feet, less than a jumbo jet’s wingspan.	Turning-point days	13 w
H112	The Pantheon’s dome is about 43 meters across, and it’s unreinforced concrete.	Ancient world	12 w
H113	Sputnik circled Earth about once every 96 minutes.	Turning-point days	8 w
H114	Gutenberg printed about 180 Bibles. Fewer than 50 survive today.	Medieval life	10 w
H115	Measured with all its branches, the Great Wall runs over 13,000 miles.	Ancient world	12 w
H116	Roanoke’s colonists numbered about 115. None were ever found.	Lost & unsolved	9 w
H117	The Voynich manuscript has about 240 pages nobody can read.	Lost & unsolved	10 w
H118	Zheng He’s first fleet reportedly carried around 27,000 people.	Exploration	9 w
H119	Ancient Rome’s Colosseum could seat about 50,000 people.	Ancient world	8 w
H120	On an 81-day voyage to Jamaica, Harrison’s watch lost about five seconds.	Exploration	12 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

09
OF 10

Strange-but-true Law or custom

A real rule or custom that sounds made up. Name the place and the century so viewers can look it up.

`In [PLACE AND CENTURY], the law said + [THE STRANGE RULE]`

H121	Russian men once paid a tax to keep their beards.	Odd laws & customs	10 w
H122	England's Tudor laws decided who could wear purple silk.	Odd laws & customs	9 w
H123	In 1386, a French town reportedly dressed a pig in clothes for its trial.	Odd laws & customs	14 w
H124	Roman laundries collected urine on purpose, and the emperor taxed it.	Ancient world	11 w
H125	England's kings banned football so men would practice archery instead.	Odd laws & customs	10 w
H126	British drivers once needed someone walking ahead waving a red flag.	Odd laws & customs	11 w
H127	In 1795, Britain made anyone using hair powder buy a yearly certificate.	Odd laws & customs	12 w
H128	In 1266, English law tied the weight of a loaf to grain prices.	Medieval life	13 w
H129	During Saturnalia, Roman masters sometimes served dinner to the people they enslaved.	Ancient world	12 w
H130	Some medieval church courts heard cases against insects that ate crops.	Odd laws & customs	11 w
H131	In Victorian Britain, widows were expected to wear mourning clothes for about two years.	Everyday life	14 w
H132	Tudor England fined people for not going to church.	Odd laws & customs	9 w
H133	Ancient Athens could vote to banish a citizen for ten years, no crime needed.	Ancient world	14 w
H134	In Edo-period Japan, only samurai could legally wear two swords.	Odd laws & customs	10 w
H135	A 1336 English law limited most people's meals to two courses.	Medieval life	11 w

Say it, then check it. About 3–6 s each at 2.5 words/s; up to 9 words fit the 0–3 s hook beat, so let a longer hook run into beat 2. Every hook states a real fact: check it in a general reference before you post.

10
OF 10

Unsolved or Lost

A real open question. Say clearly what is known and what is not; never present a theory or a paranormal idea as fact.

`[THING] is still unsolved. + [WHAT WE ACTUALLY KNOW]`

H136	An entire English colony disappeared, leaving one word carved on a post.	Lost & unsolved	12 w

PIN Which two events should I put on one timeline next?

Medieval People Knew the Earth Was Round

BEAT TIMELINE (SECONDS)

0 3 9 16 23 30

TIME (S)	VOICEOVER	VISUAL	CAPTION / PAUSE	TONE
0–3 HOOK	Medieval people did not think the Earth was flat.	Medieval round-world map (public domain); flat map crossed out	▶ Big card: NOT FLAT	Confident
3–9	Scholars like the English monk Bede, around 700, wrote about a round Earth.	Manuscript page photo, museum open-access	Label “Bede, c. 700”	Calm
9–16	Medieval kings even held a ball with a cross, a symbol of rule over the world.	Artefact photo: royal orb	Highlight “a ball”	Curious
16–23	The flat-Earth story mostly spread in the 1800s, in popular books about Columbus.	Timeline graphic: 700 → 1800s	⏸ Pause before “1800s”	Reveal
23–30 CTA	So the myth is newer than the people it describes. What myth should I check next?	Round world painting, slow zoom	Hold question 1.5 s	Warm

VERIFY WITH Encyclopaedia Britannica: “Flat Earth” and “Bede” entries

MYTH CHECK **Popular version:** Medieval Europeans believed the Earth was flat. **Documented:** Educated medieval writers described a round Earth; the flat-Earth story spread in the 1800s.

Make it yours

3 swaps so it’s your video

1. Open on a medieval globe-and-cross symbol of royal power instead.
2. Name Bede’s book on time-reckoning as your main example.
3. End by asking which school “fact” viewers want checked.

Ready to post

TITLE Medieval People Knew the Earth Was Round

Magna Carta Was Cancelled Within Weeks

BEAT TIMELINE (SECONDS)

0 3 10 18 27 36 45 54 60

TIME (S)	VOICEOVER	VISUAL	CAPTION / PAUSE	TONE
0–3 HOOK	Magna Carta failed within weeks. It became famous anyway.	Public-domain image of a Magna Carta manuscript	▶ Big card: FAILED FIRST	Intrigued
3–10	In June 1215, rebel barons forced King John to agree to a charter at Runnymede, near London.	Map pin on Runnymede	Label “June 1215”	Storyteller
10–18	It promised that the king would follow the law, and limited unfair taxes and seizures.	Re-creation: charter with wax seal	⏸ Pause after “follow the law”	Explaining
18–27	The popular version says it gave rights to everyone. In fact it mostly protected barons and free men.	Simple graphic: small group highlighted in a crowd	Highlight “mostly barons”	Careful
27–36	John asked the Pope to cancel it. Within about ten weeks it was annulled, and war followed.	Timeline graphic: June → August 1215	▶ New card per sentence	Tense
36–45	After John died, it was reissued several times, and later versions entered English law.	Timeline graphic: 1216, 1217, 1225 markers	⏸ Pause after “reissued”	Steady
45–54	Only a few of its clauses are still law in England today, but its ideas spread far.	Close-up of manuscript text	Highlight “still law”	Reflective
54–60 CTA	Which old document do you think still matters most?	Manuscript, slow zoom	Hold question 1.5 s	Warm

VERIFY WITH The British Library: Magna Carta · The National Archives (UK): Magna Carta

MYTH CHECK **Popular version:** Magna Carta gave rights to all English people in 1215. **Documented:** It mainly protected barons and free men; it was annulled within weeks and reissued later.

When Maps Showed California as an Island

BEAT TIMELINE (SECONDS)

0 3 10 18 27 36 45 54 60

TIME (S)	VOICEOVER	VISUAL	CAPTION / PAUSE	TONE
0–3 HOOK	For a century, maps showed California as an island.	Public-domain map with California as an island	▶ Big card: AN ISLAND?	Playful
3–10	Early Spanish explorers had mapped it correctly in the 1500s, as a long peninsula.	Old map showing a peninsula (public domain)	Label “1500s”	Storyteller
10–18	Then in the early 1600s, island maps appeared. One possible source was a misread or exaggerated expedition report.	Timeline graphic: early 1600s marker	⏸ Pause after “appeared”	Curious
18–27	Mapmakers in Europe copied each other. Once one famous map showed an island, many more followed.	Re-creation: maps copied in a chain	▶ New card per sentence	Explaining
27–36	Few people in Europe could check. Most mapmakers never travelled to the places they drew.	Simple graphic: mapmaker at a desk, ocean between	Highlight “never travelled”	Wry
36–45	Overland trips by missionaries around 1700 showed that California was joined to the mainland.	Map: overland route around the gulf	⏸ Pause after “joined”	Clear
45–54	Even so, island maps kept appearing for decades, until a Spanish decree in 1747 declared California not an island.	Timeline graphic: 1700 → 1747	Highlight “1747”	Reveal
54–60 CTA	Old maps can be wrong for a long time. Which old map mistake do you find funniest?	Island map, slow zoom	Hold question 1.5 s	Fun

VERIFY WITH	Library of Congress: Geography and Map Division · Stanford University Libraries: California as an Island collection

Turn a script into a video in 6 steps

A generic workflow that works with any text-to-speech tool, any video editor and any images you have the rights to.

1. **Personalize and check**
   Apply at least one “Make it yours” swap and look up the core fact in the “Verify with” reference. Read the script aloud once with a timer.

2. **Record the voiceover**
   Paste the Voiceover column into any text-to-speech tool, or record yourself at about 150 words per minute. Leave the pauses in the Caption / pause column.

3. **Gather visuals you have rights to**
   Public-domain paintings and old maps, museum open-access photos, your own sketches, simple re-creations and timeline graphics made in any design tool.

4. **Cut beat by beat**
   Use the Time (s) column as your edit list: one cut or overlay change at each beat boundary. The beat timeline on each page shows where they fall.

5. **Add captions**
   Big captions, 1–3 words per card. Highlight the words named in the Caption / pause column and hold the final question on screen for about 1.5 s.

6. **Post and pin**
   Use the “Ready to post” box: title, description, hashtags and cover text. Turn on any disclosure the platform requires, and pin the suggested comment.

Batch tip: the CSV edit list

Open `script_beats.csv` in Google Sheets or Excel and filter by `script_id`. Each row is one beat with start and end seconds, voiceover, visual, caption and tone: an edit list you can keep open next to your editor.

Make a series

Pair a script with a hook of the same theme from the library for a second video, or use the “Make it yours” swaps to film a new angle on the same event.

FAQ

Which themes are covered?
8 themes: Ancient world; Medieval life; Exploration & navigation; Inventions & science history; Odd laws & customs; Turning-point days; Everyday life in the past; Lost & unsolved. Each has at least 7 scripts.

How many hooks are there?
150 hooks: 10 hook types × 15 hooks each (H001–H150). The first 6 types are history-specific structures. Each hook is tagged with one of the 8 themes.

What is NOT covered?
True crime, gore or atrocity detail, war-crime retellings, modern politics (events after 1991), living people, religion debates, conspiracy theories, and non-English text.

Can I add my own hooks?
Yes. hooks.csv is a plain spreadsheet you can extend with your own rows. There is no generator.

Does it batch-generate a week of scripts?
No. It is a library of 60 finished scripts, not a generator or an app.

Does the same story come in 30, 45 and 60 s versions?
No. Each story is written at one length only: 20 stories at 30 s, 20 at 45 s and 20 at 60 s. The longest script is 60 s.

Are the facts guaranteed?
No. They come from widely documented history, but we are not professional historians. Check each fact against the named “Verify with” reference before posting.

Can I use it on a monetized channel?
Yes, on your own channels. See the License page. You can’t resell or share the scripts as a script product.

License

Simple version: use the scripts in your own content as much as you like; don't resell or share the pack.

You can

- Use any hook or script, as written or edited, in your own videos, Shorts, Reels, posts and captions.
- Use them for personal or commercial purposes, including your own monetized channels, on any number of your own channels.
- Edit, shorten, extend, translate or combine them, and read them with your own voice or any text-to-speech voice.
- Import the CSV files into your own tools, sheets and editing workflows, and add your own rows.

You can't

- Resell, share, give away or upload this pack, the PDFs or the CSV files, in whole or in part.
- Publish the scripts or hooks as a script product: a script pack, template, prompt pack, course, e-book or any other text product.

Good to know

- One purchase covers one creator, or one channel team working on the same channels.
- Check each fact against the named reference before posting; you are responsible for what you publish.
- Faceless Creator Kit is an independent shop and is not affiliated with any video platform, museum or publisher named in this book.

Thank you for buying from Faceless Creator Kit.
