

How to Use

Four steps. That is the whole system.

1 Brain dump

Write everything on your mind on the Brain Dump page (18). Don't sort it yet.

2 Pick 3

Choose three things that matter today. Everything else is a bonus, not a debt.

3 Place them

Drop each one into Morning, Afternoon or Evening (page 5). Rough blocks, not hours.

4 Not done? Carry it forward

Tick it into the Carry forward box and move it to the next page. No rewriting, no guilt.

Undated on purpose. Skipped a few days? No empty pages to stare at. Just start a fresh one.

Dopamine Menu (page 23). Fill it on a good day. For example, a starter could be "one song, then open the file."

Printing. Choose Actual size / 100%, not Fit to page. Black & white is all you need.

Tablet. Import the PDF into GoodNotes or Notability. Tap a line on the Contents page (3) to jump.
