PRINTING

1. Open the PDF for your paper size.
2. In the print dialog choose **Actual size / 100%**. Do not choose “Fit to page” or “Shrink”.
3. Black & white or grayscale is all you need. “Draft” mode works too.
4. Left margin is wider for hole punching and binders.

GOODNOTES / NOTABILITY

1. Save the PDF to Files (iPad) or open it from your download.
2. Tap Share, then open in **GoodNotes** or **Notability**. Or inside the app: tap **+**, then **Import**, and pick the PDF.
3. Write with your pencil. For daily planning, import the 30-day file; for other pages, use the app's page duplicate.
4. In the two full PDFs, the Contents page (3) has tap-to-jump links and each footer links back to Contents. The 30-day files have a Day index with the same kind of links. In GoodNotes, links work in read-only mode (tap the pen icon to switch).

WHERE TO START

Read page 2 (four steps, one minute). Then try the Daily Top 3 (page 4) for a week. Not done? Write it in the Carry forward box and move on. Skipped a few days? The pages are undated, so just start a fresh one.
