Quick Start

Phonics from CVC to vowel teams. No word audio: you model the sounds.

> **Scope:** 22 sound units, 452 decodable words, 220 nonsense words, 48 pictures. Roughly K–2 / young-learner levels 1–3. Not included: r-controlled vowels, two-syllable words, phoneme audio.

1 · Open the game

Copy **ESL-Phonics-Games.html** to the classroom computer or a USB stick and double-click it. It opens in Chrome, Edge, Firefox or Safari. No internet, no install, no account. Press **F** for full screen on the projector.

2 · Choose sound units

Tick one or more units (for example **short a** + **sh**). The yellow counter shows how many words are selected; you need at least 5. Set the number of teams (2–6) and the timer at the top right.

3 · Pick a game and play

Click one of the 6 game cards. Teams take turns: right answers add a point automatically, or use **+ / −** on each team card. **Space** = next word · **T** = timer · **?** = help · **Esc** = close. The home button returns to the units, and your choice stays the same in every game.

Your own words

Click **My word lists**, give the list a name, and type one word per line (5–100 words, up to 20 saved lists, import or export as .txt). Two example lines:

> **sh-i-p** ← hyphens mark the sound chunks for sound buttons and Missing Letters
> **cat = 猫** ← a meaning (any language) shown after the answer

Lines starting with **#** are ignored; ***vab** adds an alien word for Real or Nonsense.

Six games

Word Builder · Sound Sort · Missing Letters · Real or Nonsense · Picture Match · Quick Read. The Teacher Guide has one page per game and a 30-minute sample lesson.
